# CUBE EXCELLENT.

FEEL FREE TO TOUCH. CUBE EXUDES TRUE CRAFTMANSHIP.

Laying the floor is simplicity itself thanks to the tongue & groove profile. And this is the only bit with CUBE that is actually level. That, of course, is the whole point of it. This natural wood panel forms part of the Admonter ELEMENTs range, and its appeal comes from its multi-dimensional nature.

Totally enchanting. Walls, ceilings, furniture and objects all automatically gain that extra charm factor from CUBE. Our range comprises nine different designs. There are two additional special options made from sunbaked reclaimed wood and reclaimed alder. Each of these separate products has a grain pattern, a finish and a format that suits it perfectly.

# GALLERIA UNIQUE.

UNIQUE, THE FEELING OF ADMONTER WOOD.

The wall cladding elements Galleria give the interesting look of floor boards on the wall. They offer individual and deep textures that would be beyond the possibility of a board structure that would be laid on a floor.

Admonter wood goes up on walls. The new wall cladding elements Galleria in plank-design offer individual and deep textures beyond the possibilities of a floorboard. Fascinating variety. Fast and easy in handling.

# CREATIVE WALL DESIGN PRINTED ELEMENTS SPRUCE

The new printed GALLERIA elements present a product that goes far beyond the visual effects of wood and combines a contemporary, graphical design with the natural material – executed on heavily brushed spruce (on request also possible on natural wood panels).

Whether for home or on a larger scale for stylistic effect: The selection of designs can give form to a variety of interior furnishing ideas and transfers the graphic elements in sharp focus to the wall or the furniture.
