DESIGN TRENDS 2019

2019 Trend is for pure color and natural surface of the wood. Our new collections represent shades of warm grey and beige colors. The **Pure Line Collection** brings us color of untreated raw wood in finished parquet flooring. New lacquer surfaces with 5% gloss give the natural oil feeling.

PURE LINE

1 Strip US Black Walnut BC 2B Pure Line #5838

PURE LINE wood floors will show far fewer dents and scratches comparing to high-gloss floors. The natural color of the wood stays unchanged. There is also no yellowing effect as other lacquers normally have.

Walnut is a timeless classic. It was always considered as rich dark color tone. Pure line finish makes it lighter and shows traditional elegance of walnut in a new way. It is a perfect fit for modern interior.

REACTIVE STAIN - ANTIQUÉ & RUSTIC CHARACTER

CREATING COLORS FROM WITHIN

REACTIVE STAIN is a water-based wood stain that gives wooden floors an aged, antique and rustic character. It is pigment-free and employs carefully selected chemicals that interact with the tannins in the oak to change the color.

REACTIVE STAIN

Different origin oak will behave differently when treated with reactive stain. The photos show difference between treated European vs. American White Oak.

HERRINGBONE WITH CLICK SYSTEM

Boards are perfectly aligned thanks to the **CLICK** system. Installed floor has ideal geometry. Installation process is much quicker and easier.

The short side has a vertical fold down system. Glue needs to be applied on four sides of the lock system for a floating floor. Glue down installation method is also possible.

1 STRIP RANDOM LENGTHS PATTERN

The new pattern consists from several lamellas glued on the short side. Once installed this pattern looks like random length parquet flooring

It was specifically designed in order to make the 1 Strip Wood Floor with a higher grade more affordable. Boards are in fixed length, which makes it quick and easy to install.
