

# Painters Collection

2021

A close-up photograph of a hand holding a blue pen, painting a vibrant red abstract shape on a white canvas. The pen is angled diagonally across the frame, with the tip touching the canvas. The red paint is thick and glossy, creating a smooth, curved stroke. The hand is positioned on the right side of the frame, with fingers gripping the pen. The background is a blurred white canvas with faint, dark lines, suggesting a creative workspace. The overall composition is clean and focused on the act of painting.

# Creative process

As we create new collections, we reach to the source – trends and solutions present in the world of fashion and design – both the most recent and timeless ones.

Collection

## SUPERMATT FINISH – LOOKS LIKE OIL, EASY TO CLEAN LIKE VARNISH

A collection of oak wooden floors in the pattern of 1-row full plank. The floor surfaces in fashionable colours have been refined and secured with elegant, supermatt varnish, which looks like oil, but it's ease to clean like varnish.

Each floor has micro-bevel on 2 or 4 sides of the board, which emphasizes its' modern character.

The floors can be installed over a floor heating system.

**Premium  
SIZE**  
2200x182x14 mm

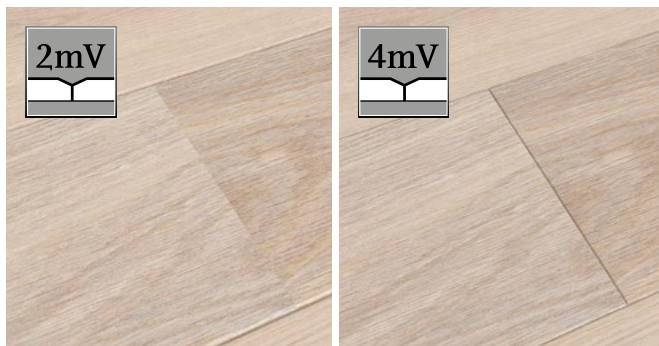

# Main features of the collection

## 100% NATURAL WOOD

Three-layered structure of 3.5mm thick top layer made of oak, and the middle and bottom layers made of spruce.

## MICROBEVEL ON THE SHORT AS WELL AS SHORT AND LONG SIDES OF THE BOARD

Delicately crafted 2mV or 4mV microbevel enhances the shape of individual boards, bringing out their individual character and beauty.

## 5G ADHESIVE-FREE ASSEMBLY SYSTEM

One of the most modern adhesive-free joints available on the market, which enables a speedy and clean installation. The floor is ready to be used right on installation.

## INSTALLATION OVER UNDERFLOOR HEATING

Every floor in the collection can be installed over underfloor heating, thanks to which you will achieve the effect of a floor which is always warm to the touch.

# Grade of oak wood

## OAK ELEGANCE

Delicate wood grain, subdued colour, no sapwood, dainty knots.

## OAK CLASSIC

Contrasts of wood colour and pattern, medium-sized knots, and no external sapwood.

## OAK UNIQUE

Strong contrasts of wood colour and pattern, large knots, sapwood acceptable up to 20% of board width.

## OAK RUSTIC

Highly rustic character, strong contrasts of wood colour and pattern, large knots, no external sapwood.

## OAK SUPERRUSTIC

Highly rustic character, strong contrasts of wood colour and pattern, large knots, acceptable sapwood without limitation in surface area or quantitative share in the batch.

# Supermatt lacquer

It gives the surface a supermatt finish which resembles an oiled surface, but is easy to clean and maintain just like lacquer.

## FASHIONABLE SURFACE

Oak floors with most fashionable finishes in keeping with the latest trends; their surfaces have been additionally enhanced in the brushing process.

## SAFE FOR ALLERGY SUFFERERS

Wood is an excellent solution for allergy sufferers, because it does not contain substances that might cause allergy, and it does not gather dust.

## AESTHETICS AND COMFORT

The floors in the Painters collection are an excellent aesthetic and functional solution for both commercial and private interiors, lending them an individual and invariably unique character.

# Creation

Inspirations – carefully selected and developed, they constitute the basis for the process of creation. Thanks to this, the floor collections on offer feature a variety of carefully picked styles.

# Baltic Wood

Baltic Wood combines fascination for the beauty of wood and knowledge about its specialist treatment. Thanks to this, Baltic Wood floors are not only beautiful, but also perfect in terms of quality – durable, functional and easy to maintain on a regular basis.

## OUR MISSION

We believe that the floor made of the highest quality wood is that which lends a unique character to every interior – both the classical and the modern one. That is why we continually follow the latest trends in design so as to cater to the tastes of both traditionalists and those who value more avant-garde design.

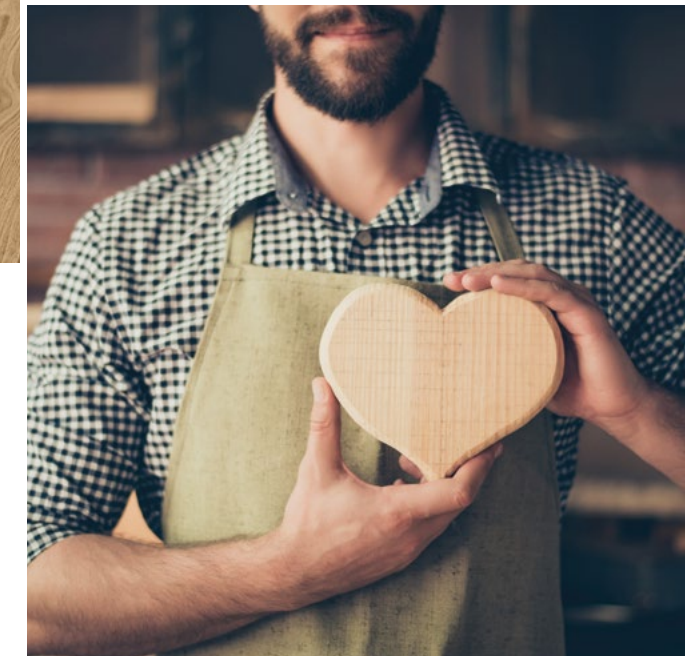

## SUPREME QUALITY

Creating floors of the highest quality is our main goal and priority in the strategy of the company development. All the processes – designing, planning, manufacturing and delivering the goods – are based on a single, coherent Integrated Quality and Environmental Management System.

## KNOWLEDGE AND EXPERIENCE

The company was founded 20 years ago in Poland and quickly expanded its brand into the international marketplace. Today, thanks to an extensive partner network, Baltic Wood floors reach clients in 62 countries all over the world. The modern production plant, the company head office and the sales offices are located in the town of Jasło, the Subcarpathian Province.

## WE CARE FOR THE NATURAL ENVIRONMENT

We love nature and therefore we take so much care to make the manufacturing of Baltic Wood floors meet the most rigorous conservation standards. The supreme quality and care for the environment certified by: FSC, M1, TÜV.

# Wooden floors

Nature offers beauty, harmony, elegance and style which cannot be replaced with any substitute.

## Three-layered floors

precision of workmanship +  
reliable use

### WOODEN FLOOR

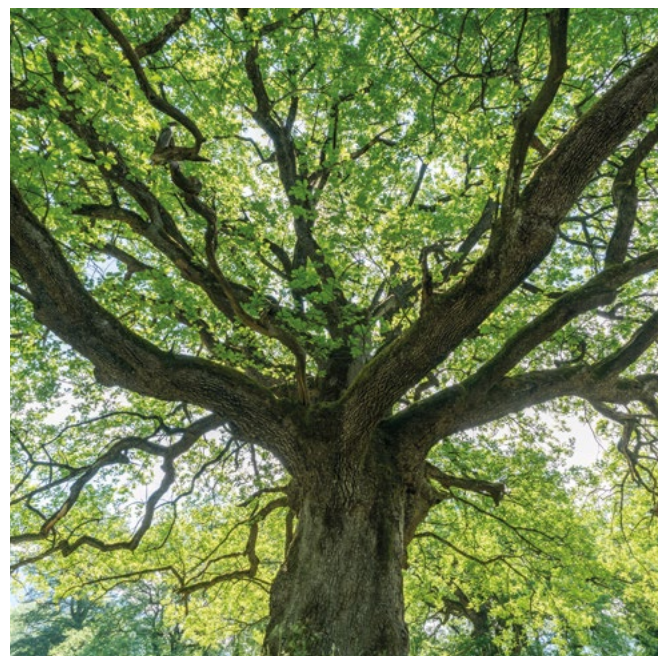

Thanks to the natural properties of the material and its characteristic and original look, wooden flooring makes it possible to create a cosy, distinguished interior with a touch of comfort and safety. Wood is warm and pleasant to the touch, and so it makes you want to walk barefoot around every nook and cranny of the house. Besides, it has very practical qualities – it muffles noises and sounds of footsteps. The natural material also ensures a long lifetime – time is on its side, making it look more and more noble, and thanks to its (multiple) renovatability, we can enjoy its unchanging beauty for many years.

Baltic Wood wooden floors owe their uniqueness primarily to nature inspiring displayed in flooring compositions that lend interiors a fascinating character.

### CARE FOR NATURE

With the support of innovative technology compliant with the highest quality standards, Baltic Wood wooden floors are sustainable and eco-friendly.

### THE STRUCTURE OF THREE-LAYERED FLOOR

Baltic Wood floor comprises three layers. The top layer made of noble wood (2.7-6.6 mm thick) is covered with seven coats of lacquer or two coats of oil. Both the finishes make up, on the floor surface, a thin, flexible and durable protective coating. The middle layer (approx. 8.9 mm thick) includes transverse spruce slats that reinforce the floor flexibility. The bottom layer (approx. 1.6 mm thick) is made of uniform spruce veneer, which stabilises and stiffens the whole structure.

# Wooden floor maintenance

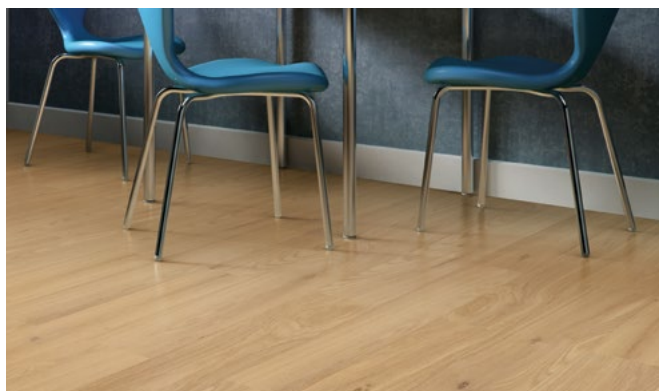

## VACUUM CLEAN THE FLOOR

Regularly (at least twice a week) clean your floors with a vacuum cleaner and a special brush attachment or with a soft sweeper. Floor mopping must be preceded by vacuum-cleaning.

## USE APPROPRIATE CLEANING AGENTS

Clean wooden floors with a moist, but not wet mop. The excessive amount of water can cause swelling, warping or discoloration of the floor. Accidentally spilt liquids must be immediately wiped up, otherwise the stains will become hardly removable. Use only Baltic Protection System agents. Do not apply waxes, as they can easily matt the wooden surface.

## PROTECT THE FLOOR AGAINST SCRATCHING

Chair or furniture legs can scratch the floor surface. Use protective caps – chair and furniture legs should be covered with protective felt pads, and in the case of swivel chairs choose ones with special castors intended for wooden surfaces. Do not use impermeable rubber mats and carpets.

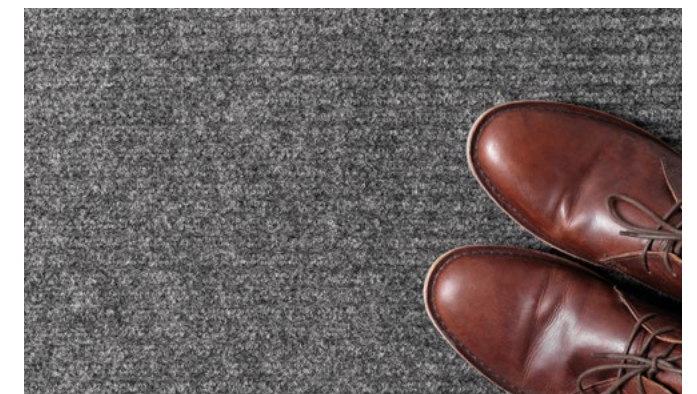

## TAKE PROPER CARE OF YOUR PET'S CLAWS

Regularly cut the claws of your pets, which will protect your floor from scratches. Remember to wipe clean the paws of your dog every time you come back from a walk – this way you will keep dirt and sand away from your interiors.

## PROTECT THE FLOOR AGAINST DIRT

Doormats – a mixture of water and sand, coupled with intense wear of the floor brings about the same effect as rubbing the floor with sandpaper. Doormats placed at the front door and the exit to the terrace protect the floor against dirt. Keep doormats clean – replace them from time to time.

## REMEMBER ABOUT AIR HUMIDITY

Keep an optimal air humidity level in the rooms, i.e. around 30-60% and temperature of 20°C; in winter, when the air humidity level drops, use air humidifiers. Remember that wood will naturally tend to achieve the state of hygroscopic balance – it is important to air the rooms from time to time.

# Sustainable solutions

For years now, Baltic Wood has been pursuing its own eco-friendly policy with ambitious conservation goals, which help protect the environment and live in harmony with nature. The company’s environmental awareness comes to be reflected in all the areas of its activity.

NOTE:  
Baltic Wood S.A. reserves the right to change the technical parameters of the products on offer as well as to discontinue them.

Baltic Wood floors are manufactured only from natural wood, and that is why the shade, occurrence of knots, ring pattern and grain structures of particular elements – boards, slats etc. – can differ from one another as well as in relation to the photos included in all Baltic Wood marketing materials. The natural variation can be noticed when comparing the final product with the samples presented at the exposition.

The wood variety is a natural feature of this noble raw material, determining its beauty and uniqueness.
